

Mahalanobis mapping: when does Hungarian improve over Greedy?

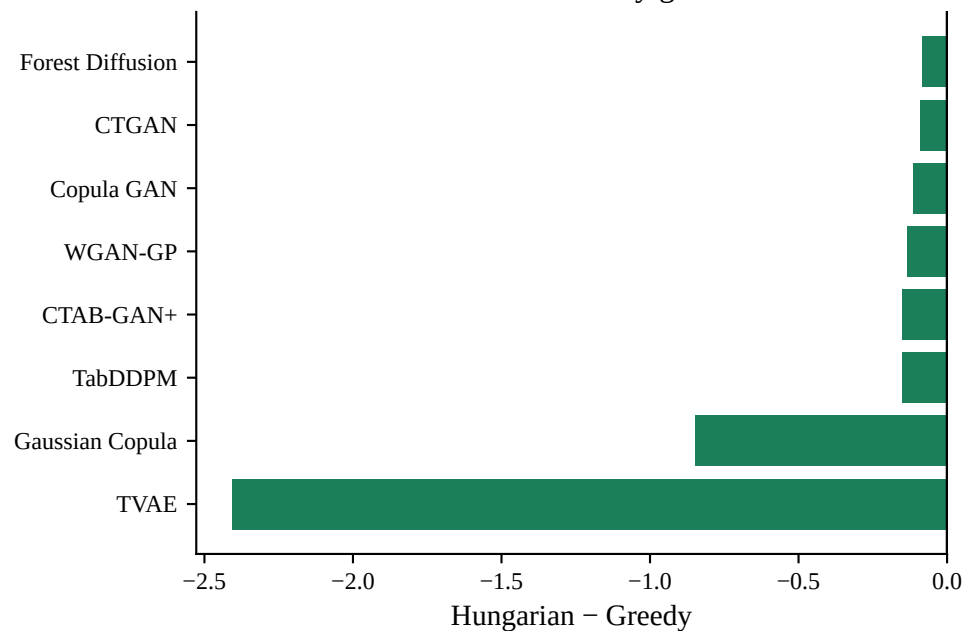

A. Overall median distance

B. Outcome direction

C. Mean difference by generator

D. Paired summary

N paired units: 114
Mean Diff (H-G): -0.491
SD Diff: 3.204
Median Diff: -0.133
% Hungarian better: 93.0%
Wilcoxon p: 2.28e-15
Rank-biserial: 0.761

Lower Mahalanobis distance = better matching.
Diff = Hungarian - Greedy; negative $\Rightarrow$ Hungarian better.
